INTRODUCTION

If you are using a POS and want to assigned Credit to your customer then this will be the good application for use. By using this application, you can easily add/update credit of your customer. This credit can be used as Payment on time of POS payment which special POS credit journal. Customer credit can easily shown on each customer on POS screen, so don't need to go back and check each customer's credit, when any order made that customer's credit will shown in front of cashier. So easily choose whether wants to pay from Credit (partially or fully) or pay from cash (normal payment method of pos).

This application allows assigned customer credit facility in Point of Sale. This application is complete features of customer credit management system for POS which manages the credit balance, pay orders and bill using credit amount, buy credit. Accounting entries managed properly Whenever credit amount use for payment or buy credit balance as well as when first time balance allocated as credit.

The screen below illustrates how an invoice can be generated from a single interface screen.

The screenshot displays the 'Sales Cash' application window. At the top, there are input fields for 'Search Items by Generic Drug Name', 'Invoice No.' (14 01 23 00001), 'Date' (14-01-2023), 'Quantity', and 'Quantity Discount %age' (0). Below this is the 'Account Information' section with 'Account' (WALKING CUSTOMER), 'Name', and 'Dr's Name' fields. The 'Sales Information' section includes a table with columns: Product Code, Batch / Serial No., Quantity, Price Per Unit, Item Rate, and Total Amount. A summary panel on the right contains fields for Sub Total, Total Payment, Item(s) Discount, Acc. Sales Discount, Total, Change, Cash, Identification, and Total Articles. At the bottom, there are radio buttons for 'Sales Quantity' (Pack, Unit), 'Percentage Setting' (Cumulative %age Discount, Item %age Discount), 'Discount' (Percentage, Manual), and 'Sale' (Auto, Manual). A control bar at the very bottom contains buttons for 'Control Center', 'Print Preview (F9)', 'Print (F8)', 'Save (F7)', 'Cancel (ALT + N)', and 'Close (F12)'.

Marketflow Pharmacy Professional is an elite accounts management software, presided with veracity exactitude and accuracy to administer your daily competitive transactions. Organize your orders, customers and inventory all in one place. Use barcodes for tracking stock. With everything all together, you'll get what you need.

Some of the additional functionality includes supplier processing and account payment statements. As the POS transactions are updated, sophisticated reports such as the Daily Sales

Report shows the date and time per transaction, allowing even more control and insight into your business. You can use this report to determine your busiest time of day, ensuring that you have adequate staff at specific times throughout the day.

Using marketFlow's advanced stock control and pricing matrix, you are able to determine pricing per customer, volume-based discounts and special prices. The system also interfaces with most popular barcode scanners.

A single point of entry allows for easy management of daily cash-ups through Statement Manager. You can begin to analysis the sales and purchasing of your stock to enhance buying decisions using the Business Intelligence reporting tool.
